

## The following is presented as suggestions for the BECC Conference—Lightning

---

For more information or help contact:

Cara Lee Mahany Braithwait at [samb@caenergy.com](mailto:samb@caenergy.com)  
or by calling 608-216-7164

## How long?

---

- 5-8 minutes for presentation...more on this in a few slides

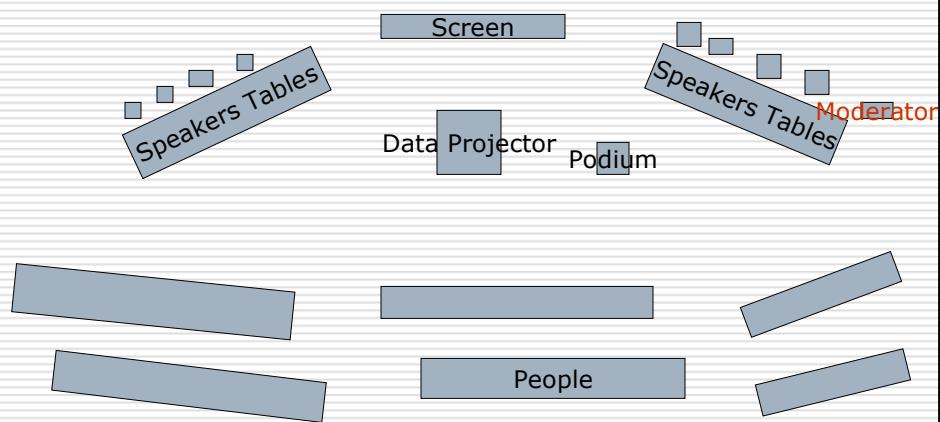

## In the Room

---

- There will be a table for four on either side of the room
  - Two table mics for questions on each table
  - One podium and one podium mic
  - One computer
  - Data projector, screen, pointer and wireless mic (the AV will be linked to a master unit)
  - Speaker Timer—see next page
- 

## This is how your room will look

---

## In the room

---

### You are not alone! Your Room Manager

- Will explain how the time clock works.
- If you need lights dimmed, they can do it. If someone needs to be thrown out...
- They are there to help you stay on target with your work and on time.

## On the computer

---

- You should have a file folder with your session's name on it
- Save your presentation in that file folder
- Run through quickly to make sure it is not family photos

## Tips For Creating A 5 Minute Presentation

---

Use the tips in this set of slides and your speaker's work should look more:

- Professional
- Useful
- Credible
- Interesting

And, you will be in control of your session

---

## How to OPEN-Short Talk

---

- You have 45 seconds to capture attention
- Why should anyone listen (what is in it for them)
- Why the work is important
- What you want them to remember

## Tips on Opening

---

- Ask a provocative question
  - Note something relevant that has just happened in the news
  - Use an appropriate quote
  - Do not try opening with a joke unless you are really sure of the joke
  - Cite a startling, interesting fact that relates to your work
- 

## Unlike jokes

---

- Don't wait till the end of your talk for the punch line—tell it now!

Perfect Bread

And...

No  
Radiation  
Poisoning

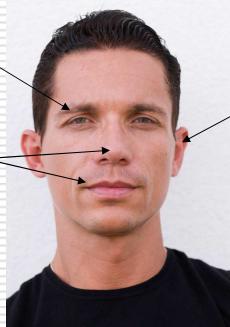

## This is how we take in information

---

Eyes 75%

Hearing 13%

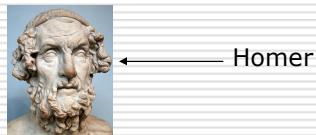

Smell, taste  
and touch  
12%

## Use both words and pictures

---

- Words and pictures are 6 times more powerful when used together

- Homer "The mind is more slowly stirred by the ear than the eye"
-

## **However—6 deadly sins**

---

- “I know you cannot read this”
- Too many words on a slide
- Too many slides for your time slot

## **6 Deadly Sins**

---

- Dark or busy backgrounds
- Pictures that do not tell a story

## Guaranteed Death

- Do not, under any circumstances,  
READ your slide to the audience

## Word Slides

- Use bullet points, not sentences
  - Keep concepts simple
    - No more than three curves (lines) on a graph
      - Use color, at least two, but not more than three (it's not the 60's any longer)
      - One key point per slide
      - Translate numbers into pie charts or bar charts (these are, believe it or not "Pictures" that tell a story!)

## Talk Outline—Opening 3 Slides

---

- 1 title slide (with your name etc)
- 1 opening slide-why people should listen
- 1 punch line (not a joke)-what you want remembered

All three of these should take less than  
120 seconds

## Content-4 minutes, 2 slides

---

- Describe the need for the work, what was the problem
  - What approach did you use (BIG Picture only-see me for details)
  - What did you find
  - What did you learn
  - How might others use this

## Closing-Keep it simple and to the point! 1 Slide 45 seconds....

1. Where are you in your talk—In Closing...and watch the heads pop-up.

What they can expect if they look into your work and how to find it.

2. What people can do with your work to solve XXX kind of problems

## Non-verbal tips

- Charlie Chaplin was a great comedian, and he never spoke a word.
- Think about your body language—do you believe your own work?

## **Non-verbal**

---

- Remember to smile
  - Look at the audience
  - Pauses are ok, particularly if you want to regain attention
  - Be excited as fits your personality and show conviction
  - And have fun!
-
