

2017 BECC POSTER PRESENTERS

- Carrie Armel, Precourt Energy Efficiency Center, Stanford University:** *HowPower: A Dynamic New Energy-Saving App*
- Dustin Bailey, Navigant:** *Evaluating Persistence for SEM Programs*
- Gbemisola Banjoko, University of Central Lancashire:** *Domestic Energy Consumption: An Investigation into How Energy Cultures Are Formed*
- Keari Bell-Gawne, Cool Choices:** *Who Is Likely To Do What? A Meta-Analysis of Thousands*
- Stephen Bird, Clarkson University:** *Impact of Motivation and Feedback on Electricity and Water Use: A Field Experiment*
- Martin Bond, Community Energy Services:** *Green West Oakland*
- Tarik Borogovac, FirstFuel Software:** *Energy Savings via Personalized Analytics for Commercial Buildings: A Panel Approach*
- Eric Cahill, Plug In America:** *Report from the Dealer Trenches: Selling EVs in San Diego*
- Jennifer Cole, University of Colorado Boulder:** *The Role of Party Identity in Support for Climate Policy*
- Simona D'Oca, Lawrence Berkeley National Laboratory:** *Predicting Collective Occupancy Presence and Comfort Preference for Optimizing a Model Predictive Control in Office Buildings*
- Ryan Dwyer, University of British Columbia:** *Social and Informational Strategies for Reducing Shared Energy Consumption in Institutional and Multi-Unit Residential Buildings*
- Karen Ehrhardt-Martinez, Navigant:** *Uniform Method for Estimating the Potential Energy Savings from Behavior Change in the Residential Sector*
- Mieko Fujisawa, Kanazawa University:** *Relativity Analysis of Registration of Home Electricity Consumption Visualization and Agreement with Electricity Peak Shift*
- Jonathan Gilligan, Vanderbilt University:** *Private Governance and Greenhouse Gas Emissions Reductions*
- Pace Goodman, Navigant:** *Clearing Up the Unclear Savings of Advanced Thermostats*
- Alena Grunwald, Ontario Public Service:** *Beyond Awareness: Funding Behaviour-Based Initiatives to increase Low-Carbon Choices*
- Dana Harmon, Texas Energy Poverty Research Institute:** *Energy Poverty Research Landscape Analysis*
- Jeff Haynes, DNV GL:** *How the Principles of an Ancient Ritual Can Overcome Modern Resistance*
- Lisa Heidell, Skumatz Economic Research Associates:** *Bottles, Cans, and Wrappers on the Fly—How Do We Encourage Recycling in Parks, Trails, and Public Spaces?*
- Cem Keskin, Ozyegin University:** *A “Game” of Leveraging Behavior Change through ICT*
- Peter Love, York University:** *Free On-line Textbook on Energy Efficiency*
- Mahdi Mahmoudzadeh, Georgia Tech, Scheller College of Business:** *Charging for Optional Recycling and Nudging the Consumers toward Green Products*
- Despoina Manouseli, University of Southampton:** *A Social Practices-Based Microsimulation Model for Estimating Domestic Hot Water Demand in the UK*
- Dana Max, Navigant:** *Engagement Empowers*
- Ayako Mikami, Tokyo Gas Company, Ltd.:** *Can Energy Savings Education Encourage Behavior Change?*
- Mitch Moore, BlueLA:** *Innovative EV Car Sharing Pilot Program Targets Disadvantaged Communities in LA*
- Jeremy Offenstein, ADM Associates:** *Accounting for Timing: Deferred Free Ridership in Net Savings Estimation*
- Katie Parkinson, Apex Analytics:** *Applying Behavioral Science to Encourage Energy Efficiency*
- Grace Relf, American Council for an Energy-Efficient Economy:** *The 2017 Utility Energy Efficiency Scorecard*
- Peter Rusin, Energy Smart Colorado:** *Energy Smart Colorado: A Replicable Model for Implementing Large Scale Residential Energy Efficiency at the Community Level*
- Chris Russell, NMR Group:** *A Clarification Please: Comparing the Different Meanings of Persistence in Home Energy Report Programs and the Implications for Program Designs*

2017 BECC POSTER PRESENTERS

Brittany Sellers, City of Orlando: *What Do Building Occupants Think about Their Energy Retrofits? A Survey of City of Orlando Employees*

Constantinos Spandagos, Hong Kong University of Science and Technology: *Fuzzy Model for Estimating Energy Consumption of Large Residential Populations Based on Behavioral Economic Concepts: The Role of Environmental Concerns, Social Media, Local Community Peer Pressure, and Monetary Rewards*

C. Anna Spurlock, Lawrence Berkeley National Laboratory: *The Whole Traveler in an Era of Transportation Innovation*

Michaelangelo Tabone, Stanford University: *An Empirical Study of Consumer Behavior Impacts on Using Appliances as Electricity Storage*

Yoshiaki Ushifusa, University of Kitakyushu: *Behavioral Study of Personalized Automated Demand Response in Workplaces*

Hannes von Knorring, Gothenburg Research Institute, University of Gothenburg: *How to Order an Energy-Efficient Ship?*

Fei Xie, Oak Ridge National Laboratory: *Impacts of Expanding National Public Charging Infrastructure on Electric Vehicle Market Adoption, Transportation Energy, and Compliance with Energy and Environmental Regulations*

Arthur Yip, Carnegie Mellon University: *Implications of Choice Set Aggregation in Vehicle Choice Models*
