Presentation Title: Perspective on Energy of the Largest Housing Finance Institution in the World on the Effectiveness of Set-back Thermostats on LMI Clients

Abstract: What is the perspective of the largest housing finance institute in the world on the effectiveness of set-back thermostats on LMI clients? If savings occur could these savings lead to another unexpected benefit from energy efficiency? This presentation will describe a study to determine if there is a correlation between smart thermostat usage for low- to medium-income (LMI) homeowners and an improvement in financial health, and if so, what is the scale of impact.
